Tail Gate Safety Meeting. Pumping well, Tubing pressure 345 Casing pressure 100 and flare is lite. From 6:am Saturday morning to 6:am Sunday morning well pumped 28 bbl for a total of 18,944 bbl pumped. Total fluid that was in well 21,372 bbl. Fluid recovered from flow back 4130 bbl. Fluid recovered from pumping well 18,944 bbl. Total fluid recovered 23,035 bbl. 21,372 bbl pumped in well - 23,035 bbl recovered = +1635 bbl. The Tanks Flare Line = Gas Measured 3.5 cubic ft. Total Cubic ft. = 834.4 cu ft Well Flare Line = 18 cu ft gas measured. Total gas measured= 3360 cu ft. Oil Pumped - 27 bbls Total Oil Pumped : 10,229 bbls Gas Released To Air, Opened Lids For 5 Minutes Total Minutes Gas Released: 1293 Minutes													WORK NECESSARY TO FISH PLUNGER?						
													CHARGED TO AFE?
